PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of remote experience shipping web applications end to end — React, Next.js and TypeScript front-ends over Node.js, Express and PostgreSQL back-ends — from billing and POS platforms to Progressive Web Apps. Used to owning features from database schema to deployment: designing REST APIs, integrating third-party services (Stripe, Supabase), and debugging and solving problems across the stack with minimal supervision. Fluent in English and Arabic.

CORE SKILLS

Front-End: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5/CSS3, API integration, Tailwind CSS, MUI (Material UI), Cross-browser & responsive UI, Accessible, semantic UI (ARIA, keyboard navigation, WCAG-aware), Bootstrap, Progressive Web Apps (PWA)
Back-End: Node.js, Express.js, RESTful API (REST/JSON) development & consumption, Third-party service integration (Stripe, Supabase), PostgreSQL, SQLite, JWT & RBAC authentication, Raw SQL (ACID transactions), Redis (caching & rate limiting)
Tools & Practices: Git/GitHub, Python, AI-assisted development (GLM-powered agentic coding CLI, Google Antigravity), Agile remote workflows (weekly stand-ups), Unit testing (Vitest), Debugging & performance optimization, State management (Zustand), Real-time dashboards, Bilingual (EN/AR) UI development, Figma (UI design), Docker, CI/CD via Vercel (automated build & deploy on push, preview deployments)
Languages: Arabic (native), English (fluent)

WORK EXPERIENCE

Front-End Developer (Remote)

PointCraft | 2025 – Present

- Built a responsive invoice-management web application (React, TypeScript, MUI) streamlining transaction tracking and record reconciliation for daily operations.
- Built self-checkout and POS web interfaces, structuring reactive state management so dynamic carts and concurrent order flows stay responsive.
- Designed UI in Figma and shipped accessible, theme-consistent interfaces across mobile and desktop viewports, improving operator speed and reducing input friction.
- Worked in weekly remote stand-ups, reporting completed work and planned next steps to the team.

Full-Stack Web Developer (Remote)

Freelance clients | 2023 – 2025

- Architected and shipped production web applications end to end for clients in logistics and bilingual community products — requirements, PostgreSQL schema design, REST API, UI and deployment.
- Engineered ClearCarGO, a customs-clearance platform with real-time shipment tracking, automated Stripe payment workflows, and role-based access control (Next.js 14, TypeScript).
- Applied Redis caching and rate-limiting to keep API hot paths fast and abuse-resistant.

PROJECTS

Hayya 'Ala Al-Salah — Masjid Kiosk Display

React 18 · TypeScript · Zustand · MUI | 2026

- Built a 24/7 kiosk display application running continuously in full-screen mode on Chromium hardware.
- Powered a live prayer countdown timer and RTL announcement tickers with Zustand, rendering without lag.

Kun Min Aldhaakirin — Islamic Remembrance PWA

Next.js 15 · React 19 · Supabase | 2024

- Built a Progressive Web App with Next.js 15, React 19, TypeScript, and Tailwind CSS.
- Integrated Supabase for storage and authentication, service-worker caching, dark/light themes, and English/Arabic support.

Post-It — Full-Stack Social Platform

React 18 · Express · PostgreSQL | 2023

- Built dynamic feeds, threaded comments, and Zustand state management.
- Implemented the security and back-end infrastructure: dual-token JWT authentication, Redis rate limiting, and raw SQL ACID transactions.

EDUCATION

B.Sc. Computer Science (in progress) — University of the People (online) | 2026 – Present
Associate's degree — Technical Institute for Hotels and Tourism, Alexandria, Egypt | 2013 – 2015

CERTIFICATIONS

CS50x: Introduction to Computer Science — Harvard X (edX) — 2024
Advanced Full-Stack Web Development — Udacity — 2022
Responsive Web Design — freeCodeCamp — 2022
Front End Web Development Professional — Udacity — 2021
Front End Developer Track — Udacity — 2018
